

## **Suggested Changes to the Gazebo**

Plans for Gazebo area improvements will be described to determine whether to proceed with suggested changes. The Clemson University landscape Architecture students provided us with outcomes of surveys taken by them. Suggested were: More benches along walking areas, electricity in gazebo for gatherings, and a “garden house appearance” facility housing a composting bathroom and a storage area at the Gazebo site. Estimates of cost will be discussed. We are seeking input from surrounding residents as well as all POA members.
